PROFESSIONAL SUMMARY

Computer Science Engineering graduate with a strong foundation in Java Full Stack Development. Proficient in Core Java, JDBC, Servlets, JSP, Spring Boot, SQL, HTML, and CSS with hands-on experience in developing full-stack applications and completing an Android development internship integrating Firebase and Generative AI. Seeking a Java Full Stack Developer role to build scalable, production-grade applications.

TECHNICAL SKILLS

Languages:	Java
Backend:	JDBC, Servlets, JSP, Spring Boot
Frontend:	HTML, CSS
Tools:	Git, GitHub, VS Code, Eclipse
Database:	MySQL
Concepts:	OOP, Core Java, Collections Framework, Multithreading, Exception Handling

EDUCATION

B.E. in Computer Science & Engineering — Vivekananda Institute of Technology, Bengaluru Jul 2026
CGPA: 7.5 | Coursework: DSA, DBMS, Operating Systems, Computer Networks, OOP, Software Engineering

INTERNSHIP EXPERIENCE

Android App Development Using Generative AI Feb 2026 – Apr 2026
Generative AI & Android Development Program, Bengaluru

- Developed an Android application in Kotlin using the MVVM architecture for wildlife education and community wildlife alerts.
- Integrated the Gemini AI API to provide AI-powered wildlife information and educational content.
- Implemented Firebase Authentication for secure user login and Firebase Realtime Database for storing and synchronizing wildlife sighting alerts.

Java Full Stack Development with AI Jun 2026 – Nov 2026
Java full stack Program, Bengaluru

- Learning core Java concepts including OOP, Collections Framework, Exception Handling, Multithreading, and JDBC through hands-on programming exercises.
- Developing dynamic web applications using Servlets, JSP, MySQL, HTML, and CSS with the MVC architecture.
- Practicing REST API development, SQL database design, and Git/GitHub version control to build industry-ready full-stack applications.

PROJECTS

Karunada Vanya – Wildlife Education & Alert App Feb – Apr 2026
Kotlin, Android Studio, Firebase, Gemini API | GitHub: github.com/prajwal123-prog

- Developed a 6-screen Android application in Kotlin for wildlife education and community-based wildlife movement alerts.
- Integrated the Gemini API to generate AI-powered wildlife information and educational content within the app.
- Implemented Firebase Authentication for secure user login and Firebase Realtime Database for real-time wildlife alert reporting and synchronization.

Crime Prediction using Machine Learning Nov – Dec 2025
Python, scikit-learn, pandas, matplotlib | GitHub: github.com/prajwal123-prog

- Developed a machine learning-based crime prediction system using Python, pandas, and scikit-learn to analyze historical crime data.
- Trained and evaluated classification models, including Random Forest and Logistic Regression, to predict crime categories.
- Performed exploratory data analysis and visualized crime trends using matplotlib to support data-driven insights.

CERTIFICATIONS

Java Full Stack Development with AI- Tap Academy Expected Nov 2026
Android App Development using Generative AI - Internship Program Apr 2026
